

Gastrointestinal Control of Metabolism

May 9–13, 2017 | Tivoli Hotel and Congress Center | Copenhagen | Denmark

Scientific Organizers:

Randy J. Seeley, University of Michigan, USA

Matthias H. Tschöp, Helmholtz Zentrum München and Technische Universität München, Germany

Fiona M. Gribble, Cambridge Institute for Medical Research, University of Cambridge, UK

Joint with the meeting on **Neuronal Control of Appetite, Metabolism and Weight**

The twin epidemics of obesity and diabetes pose difficult challenges to the health of growing populations around the globe. A wide array of recent data link the gastrointestinal tract to the etiology of these diseases. Moreover, some of the most innovative approaches to treat obesity, diabetes and related metabolic disorders involve direct manipulation of the GI tract or manipulation of the signals that come from the GI tract. To this end, an important goal of this meeting will be to highlight a wide range of methodologies that can be brought to understand GI function as it relates to obesity and diabetes. One of the primary factors slowing research on this topic is that investigators with interest in GI function and metabolic disease come from a wide range of disciplines that are not generally represented at scientific meetings. A key goal of this meeting is to bring together leading investigators from around the globe. Gathering investigators who have been revealing function of the GI tract together with those sophisticated in metabolism – as well as encouraging early-career investigators to delve into this field – will be crucial to accelerate current work looking for novel therapeutic strategies. An important advance in our understanding of the GI tract is the appreciation of it as a major endocrine organ. A key component of the action of those GI hormones is their interaction with both the peripheral and central nervous system. Consequently, this meeting will be held jointly with a meeting that focuses on the “Neuronal Control of Appetite, Metabolism and Weight.” This is an ideal opportunity to bring together those who study how the GI tract generates these signals with those who study the neural systems that are targets for these signals.

Session Topics:

- Nutrient Sensing and Gut Signaling (Joint)
 - Gut Bacteria as Cause and Treatment of Metabolic Diseases
 - Stem Cells, Gut–Pancreas Development I
 - Signaling from Periphery to Brain to Modulate Energy Balance (Joint)
 - Controversies in Obesity/Diabetes Treatment. Surgery vs. Devices vs. Medicines. What Does the Future Hold?
 - Stem Cells, Gut–Pancreas Development II
 - Pharmacotherapies for Obesity and Type 2 Diabetes (Joint)
 - Novel Aspects of Gut Function
- plus two workshops

Scholarship Application & Discounted Abstract Deadline: January 12, 2017

Abstract Deadline: February 9, 2017

Discounted Registration Deadline: March 9, 2017

Note: Scholarships are available for graduate students and postdoctoral fellows and are awarded based on the abstract submitted.

KEYSTONE SYMPOSIA

on Molecular and Cellular Biology

Gastrointestinal Control of Metabolism (Z6)

Scientific Organizers: Randy J. Seeley, Matthias H. Tschöp and Fiona M. Gribble

Lead Sponsor: Novo Nordisk A/S. Sponsored by MedImmune

Neuronal Control of Appetite, Metabolism and Weight (Z5)

Scientific Organizers: Lora K. Heisler and Scott M. Sternson

May 9-13, 2017 • Tivoli Hotel and Congress Center • Copenhagen, Denmark

Lead Sponsor: Novo Nordisk A/S. Sponsored by Arena Pharmaceuticals, Inc.

Abstract & Scholarship Deadline: January 12, 2017 / Abstract Deadline: February 9, 2017 / Discounted Registration Deadline: March 9, 2017

TUESDAY, MAY 9

Arrival and Registration

WEDNESDAY, MAY 10

Welcome and Keynote Session (Joint)

- ***Lora K. Heisler**, University of Aberdeen, UK
- ***Randy J. Seeley**, University of Michigan, USA
- Stephen O'Rahilly**, University of Cambridge, UK
Metabolic Disease: Lessons from Natural Human Variation
- Klaus H. Kaestner**, University of Pennsylvania School of Medicine, USA
The Intestinal Stem Cell Niche – At the Base of It All

Nutrient Sensing and Gut Signaling (Joint)

- ***Andrew Butler**, St. Louis University, USA
- ***Fiona M. Gribble**, University of Cambridge, UK
- Ronald M. Evans**, Howard Hughes Medical Institute, Salk Institute, USA
Gut Feelings: Systemic Reach of Intestinal FXR
- Kristina Schoonjans**, École Polytechnique Fédérale de Lausanne – EPFL, Switzerland
Bile Acid Signaling in Metabolic Disease
- Joshua Thaler**, University of Washington, USA
Short Talk: Prevention of Microglial Inflammatory Signaling Reduces Susceptibility to Diet-Induced Obesity

Workshop 1 (Z6)

- ***Timo D. Müller**, Institute for Diabetes and Obesity, Germany
- Anne-Charlotte Jarry**, Paris Diderot University, France
Neuromedin U Blocks Gastric Emptying through Vagal-Dependent Mechanisms and Improves Oral Glucose Tolerance
- Geke Aline Boer**, University of Copenhagen, Biomedical Institute, Denmark
Acute Reduction of GIP: Effects on Lipid and Bone Metabolism
- Emily C. Bruggeman**, University of Texas Southwestern Medical Center, USA
Ghrelin Receptor Deletion Increases Morbidity and Mortality in a Prader-Willi Syndrome Mouse Model
- Natalia Petersen**, University of Copenhagen, Denmark
"Tailoring" the Intestinal Epithelium for Type 2 Diabetes Treatment: Modulation of L-Cell Differentiation
- Hai-Bin Ruan**, University of Minnesota, USA
Diet- and Microbiota-Sensitive Intestinal O-GlcNAc Signaling Controls Enterendocrine Cell Development and Function
- Sara Lind Jepsen**, University of Copenhagen, Denmark
Somatostatin Regulates GLP-1 Secretion through the Somatostatin Receptor Subtype 2

Workshop 1: Disorders and Diseases Associated with Weight Loss (Z5)

- ***Thomas Alexander Lutz**, University of Zürich, Switzerland
- ***Petra Kotzbeck**, Medical University of Graz, Austria
- Yong Xu**, Baylor College of Medicine, USA
5-HT Neurons and Eating Disorders
- Manon Duquenne**, Université Lille 2 - INSERM, France
A Role for Tancyte Exocytosis in the Central Control of Energy Homeostasis?
- Christian Stockmann**, PARCC – Paris Cardiovascular Research Center, France
The Role of Vascular Endothelial Growth Factor-A in the Context of Cancer Cachexia and Chemotherapy
- Kevin G. Murphy**, Imperial College London, UK
Investigating Disorders Associated with Weight Loss
- Serge Luquet**, Université Paris Diderot, France
Functional Properties of GAD65 Neurons in the Lateral Hypothalamus
- Christin Kosse**, Francis Crick Institute, UK
Functional Properties of GAD65 Neurons in the Lateral Hypothalamus
- Yunlei Yang**, SUNY Upstate Medical University, USA
Deciphering Anorexigenic Septohypothalamic Feeding Circuits

Gut Bacteria as Cause and Treatment of Metabolic Diseases (Z6)

- ***Gilles Mithieux**, INSERM, France
- Fredrik Bäckhed**, University of Gothenburg, Sweden
Microbial Signaling from the Gut and Resulting Effects on Host Metabolism
- Martin J. Blaser**, New York University School of Medicine, USA
Effects of the Early Life Microbiota on the Development of Metabolic Illnesses
- Karine Clément**, ICAN, France
Microbiome as Therapy
- Edna A. Trujillo**, University of Wisconsin Madison, USA
Short Talk: Metabolite Profiling of Plasma and Cecum Elucidates the Impacts of Host Genetics and Environment on the Gut Microbiota

Interactions between Ingestive Signals and Reward Circuits (Z5)

- ***Matt Carter**, Williams College, USA
- ***Agatha A. van der Klaauw**, University of Cambridge, UK
- Michael A. Cowley**, Monash University, Australia
Leptin Receptor Expressing Neurons of the Dorsomedial Hypothalamus Play a Limited Role in Regulating Food Intake but a Critical Role in Regulating Metabolism

KEYSTONE SYMPOSIA

on Molecular and Cellular Biology

Gastrointestinal Control of Metabolism (Z6)

Scientific Organizers: Randy J. Seeley, Matthias H. Tschöp and Fiona M. Gribble

Lead Sponsor: Novo Nordisk A/S. Sponsored by MedImmune

Neuronal Control of Appetite, Metabolism and Weight (Z5)

Scientific Organizers: Lora K. Heisler and Scott M. Sternson

May 9-13, 2017 • Tivoli Hotel and Congress Center • Copenhagen, Denmark

Lead Sponsor: Novo Nordisk A/S. Sponsored by Arena Pharmaceuticals, Inc.

Abstract & Scholarship Deadline: January 12, 2017 / Abstract Deadline: February 9, 2017 / Discounted Registration Deadline: March 9, 2017

Suzanne Lee Dickson, Sahlgrenska Academy, Gothenburg University, Sweden

Brain Ghrelin Signaling and Food Reward Behavior

Christian Lüscher, University of Geneva, Switzerland

Feeding Circuits that Can Override Metabolic Needs

Claire J. Foldi, Monash University, Australia

Short Talk: CNS Reward Pathways in Anorexia Nervosa: Insights from a Rat Model

Poster Session 1

THURSDAY, MAY 11

Stem Cells, Gut–Pancreas Development I (Z6)

***Praveen Sethupathy**, Cornell University, USA

Fiona M. Gribble, University of Cambridge, UK

The Biology of Enteroendocrine Cells

Heiko Lickert, Institute of Diabetes and Regeneration, Germany

Dissecting Intestinal Stem Cell Lineage Decisions

James M. Wells, Cincinnati Children's Hospital Research Foundation, USA

Human Pluripotent Stem Cell-Derived Gastrointestinal Organoids as New Models to Study Metabolic and Digestive Diseases

Lori Sussel, University of Colorado, USA

Loss of Beta Cell Identity Related to Diabetes

John Furness, University of Melbourne, Australia

Short Talk: Diversity of Enteroendocrine Cells between Species and Regions Studied at a Cellular and Subcellular Level

Sandra Guilmeau, Institut Cochin, France

Short Talk: Contribution of ChREBP in Intestinal GLP-1 Production

Emerging Energy Homeostasis Neurocircuitry (Z5)

***Qingchun Tong**, University of Texas Medical School at Houston, USA

***Matthew R. Hayes**, University of Pennsylvania, USA

Sabrina Diano, Yale University School of Medicine, USA

Mitochondrial Control of the Melanocortin System

Martin G. Myers, Jr., University of Michigan, USA

LepRb Signaling and the Regulation of Transcription

Joseph T. Bass, Northwestern University, USA

Identification of an SCN-AgRP Circadian Neurocircuit Regulating Obesity and Systemic Metabolism

Lori M. Zeltser, Columbia University, USA

Gene X Environment Interactions that Promote Anorexia-Like Behavior

Ali Guler, University of Virginia, USA

Short Talk: Dopamine Signaling in the SCN Regulates Circadian Consumption of High-Fat Diet

Mathias Treier, Max-Delbrueck-Center for Molecular Medicine, Germany

Short Talk: Identification of the Hypothalamic Circuit Maintaining Food Foraging

Signaling from Periphery to Brain to Modulate Energy Balance (Joint)

***Suzanne M. Appleyard**, Washington State University, USA

***David Olson**, University of Michigan, USA

Jeffrey M. Friedman, Rockefeller University, USA

Neural Control of Food Intake, Locomotion and Glucose Metabolism

Randy J. Seeley, University of Michigan, USA

How the Gut Regulates Metabolic Status

Ivan E. de Araujo, Yale University School of Medicine, USA

What Does Sugar Do to the Brain? Circuit Logic for Sugar Sensing

Céline E. Riera, Cedars-Sinai Medical Center, USA

Short Talk: The Sense of Smell Impacts Metabolic Health and Obesity

Poster Session 2

FRIDAY, MAY 12

Controversies in Obesity/Diabetes Treatment: Surgery vs. Devices vs. Medicines – What Does the Future Hold? (Z6)

***Ruth E. Gimeno**, Eli Lilly & Company, USA

Jens Juul Holst, University of Copenhagen the Panum Institute, Denmark

The Role of the Gut in the Development of Type 2 Diabetes

Tricia M. Tan, Imperial College London, UK

Triple Gut Hormones as Therapy

David E. Cummings, University of Washington, USA

Metabolic Surgery: Mechanisms and Use of “Bariatric” Operations to Treat Type 2 Diabetes

Niels Vrang, Gubra, Denmark

Short Talk: The Effect of FXR, PPAR- α/δ and GLP-1 Agonism on Liver Disease in Diet-Induced Obese and Biopsy-Confirmed Mouse Models of NASH

Wendy M. McKimpson, Columbia University, USA

Short Talk: Foxo1-Expressing Cells in the Gut as a Source of Insulin for Diabetes Treatment

Makoto Fukuda, Baylor College of Medicine, USA

Short Talk: Gut Hormone GIP Drives Hypothalamic Pathogenesis of Obesity

Hypothalamic Signals Modulating Hunger and Complex Behavior (Z5)

***Clemence Blouet**, University of Cambridge, UK

***J. Nicholas Betley**, University of Pennsylvania, USA
