

Cancer Immunotherapy: Combinations

March 23–27, 2018 | Fairmont The Queen Elizabeth | Montreal, Quebec | Canada

Scientific Organizers:

Chris Boshoff, Pfizer Inc.

Lieping Chen, Yale University, USA

Lisa Coussens, Oregon Health & Science University, USA

Held in honor of cancer immunotherapy research pioneers Dr. Alan Korman and Dr. Nils Lonberg, thanks to the generous support from an anonymous donor

By 2025, most patients with cancer will receive immunotherapy as part of their treatment regimen. This symposium will cover the most critical topics integral to this vision: How can we integrate, sequence or combine immunotherapy with standard-of-care cytotoxic therapy, radiotherapy and targeted therapies? Which preclinical models are best predictive of combination approaches? How do we combine immune agonists as well as molecules inhibiting immune-suppressive pathways with checkpoint inhibitors? What are the rational combinations for cancer vaccines and viro-therapy? Which combinatorial approaches could prevent or treat adaptive mechanisms of resistance? Most immunotherapies are being developed in isolation, or being tested as single agents in preclinical models or in clinical studies. This meeting helps to address the gaps in knowledge of how and when to combine therapies, and how to integrate immunotherapy into current standard-of-care or novel targeted therapy approaches – both preclinical and clinical. Overall, the objectives of this meeting are to: 1) Elucidate rational combinations for immunotherapy; 2) Discuss preclinical and other models to inform combinatorial approaches; 3) Understand the relevance for biomarker approaches; and 4) Provide insights into the latest preclinical and clinical data for immunotherapy combinations.

Session Topics:

- Rational Immunotherapy Combinations: Preclinical Models as Predictive or Responses
- Workshop: Biomarkers and Patient Selection Strategies for Immunotherapy Combinations
- Incorporating Checkpoint Inhibitors into SOC Chemo- and Radiotherapy Regimens
- Combining Immunotherapy with Tyrosine Kinase and Other Signaling Pathway Inhibitors
- Sequencing vs. Combinations: Insights from Biomarker and Preclinical Studies
- Immunotherapy Combinations: Preventing and Managing Resistance to Checkpoint Inhibition and T Cell Exhaustion
- Overcoming T Cell Exclusion and an Immune-Privileged Microenvironment with Combination Approaches
- Vaccines, Oncolytic Viruses and Cellular Therapies: Towards Combinations
- CTLA-4: Novel Molecules and Approaches to Combinations • HFrEF: Genetics and Epigenetics

Scholarship Application & Discounted Abstract Deadline: November 21, 2017

Abstract Deadline: December 19, 2017

Discounted Registration Deadline: January 16, 2018

Note: Scholarships are available for graduate students and postdoctoral fellows and are awarded based on the abstract submitted. Submitting an abstract is an excellent opportunity to gain exposure for your work. Abstracts submitted by the abstract deadline will also be considered for short talks on the program.

Cancer Immunotherapy: Combinations (C5)

March 23-27, 2018 • Fairmont The Queen Elizabeth • Montreal, Québec, Canada

Scientific Organizers: **Chris Boshoff, Lieping Chen and Lisa Coussens**

Held in honor of cancer immunotherapy research pioneers Dr. Alan Korman and Dr. Nils Lonberg, thanks to generous support from an anonymous donor.

Sponsored by BioLegend, Inc., Bristol-Myers Squibb Company, Cancer Research UK, Cell Research, Incyte Corporation, MedImmune, Merck & Co., Inc., OncoMed Pharmaceuticals, Inc., Pfizer Inc., Regeneron Pharmaceuticals, Inc., Surface Oncology, Takeda Pharmaceutical Company Limited, TESARO, Inc. and Thermo Fisher Scientific Inc.

Abstract & Scholarship Deadline: November 21, 2017 / Abstract Deadline: December 19, 2017 / Discounted Registration Deadline: January 16, 2018

FRIDAY, MARCH 23

Arrival and Registration

SATURDAY, MARCH 24

Welcome and Keynote Session

***Chris H. Boshoff**, Pfizer Inc., USA

***Lieping Chen**, Yale University, USA

***Lisa M. Coussens**, Oregon Health & Science University, USA

Jedd D. Wolchok, Memorial Sloan Kettering Cancer Center, USA
